

DISK ENCLOSURE WITH MULTIPLE POWER DOMAINS

William Josh Price

ABSTRACT

5 A disk enclosure includes a first group of one or more power sources that
powers a first group of elements in a first power domain and a second group of
power sources that powers a second group of elements in a second domain. The
disk enclosure also includes a first voltage circuit and a second voltage circuit that
are each powered by the first group of power sources and the second group of
power sources. The first voltage circuit powers a third group of elements while the
10 second voltage circuit powers a fourth group of elements.
